

Antenna Selection & Channel Search

INNOVATION, INTEGRATION, SOLUTIONS

Antenna selection :

To choose to receive DVB-T broadcasting either via built-in antenna or external antenna.

1. Browse the TV menu screen using [CH+]/[CH-]/[VOL+]/[VOL-] buttons to highlight the antenna selection option.
2. Press [OK] button to enter.

3. Press [VOL+] key to access the option-list.
4. Use [CH+]/[CH-] to scroll up/down.
Press [OK] button to select one option.
5. Press [MENU] key to exit.

Antenna rod extension :

For best reception of external antenna, extend the rod on both sides of antenna as shown.

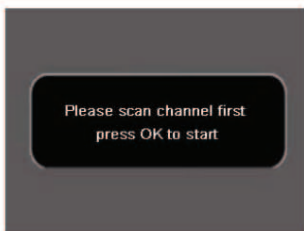

When the signal is weak,
please try the following:

Channel Search :

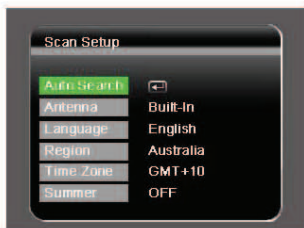

Selection Panel is shown as above when Belva 40 is turned on.

When there's no channel stored in the database.

If there're already channels stored in database.

Enter Auto Search to search available channels.
