HITV unveils the latest digital TV in-car entertainment – HiTV TRUE

Sydney Australia, February 20th 2006. HiTV Communications, a leading mobile digital TV equipment provider, today announced the release of HiTV TRUE, the new range in the next generation of mobile digital TV receivers in the Australian market.

Following the release of HiTV PURE, an industry first state-of-the-art mobile digital TV receiver in 2005, HiTV TRUE now delivers digital TV at an industry-best in the automotive world with an 18~20% increased performance to the HiTV PURE.

As the 7th generation of mobile digital TV receivers developed and manufactured by HiTV, HiTV TRUE has the latest enhancements in the patented twin-tuner decoding technology and design. Using high quality components such as German made twin-tuner chipsets, and French designed integrated controllers and the latest 32-bit VL-RISC CPU, HiTV TRUE can readily capture and convert real-time digital TV signals on the move at high speeds, overcoming Doppler effects to have minimal signal distortions. Together with a pair of uniquely developed transparent film antennas for mobile reception, HiTV brings exceptional reception quality and enables viewers to enjoy constant steady pictures even at speeds of beyond 120km/h.

Users can enjoy a host of programming formats including traffic updates, weather reports and breaking news, on top of the normal free-to-air programming. Digital TV broadcasting boasts up to 19 channels with more programming to come in the future.

With their E-Mark certification, users can be assured that HiTV products offer the highest reliability, offering the best solutions in shock protection, the best in Electromagnetic Interference (EMI) protection, temperature control and electronic safety.
