## HiTV Communications unveils latest integrated Bluetooth Car Kit

Known for providing innovative, integrated solutions for the the in-car market, HiTV Communications announces its latest addition to its product range: **the BT650 Bluetooth Hands Free Mobile Phone Car Kit.**

The HiTV BT650 Bluetooth hands free range is discreet and can be fully integrated: its advanced design allows users to quickly and easily convert mobile phones to hands free sets in their vehicles. There are five different keypad façade designs to choose from, including a classic 'factory standard' option. This will satisfy those users who are keen on keeping their vehicles in their original factory condition, as well as those who prefer more customised, individual solutions.

HiTV BT650 Bluetooth Hands Free Mobile Phone Car Kit incorporates a number of advanced DSP (Digital Signal Processing) features ensuring high quality voice and reception, as well as a reduction in clipped words, howling, echoes and ambient noise. In addition, the unit is capable of pairing at minimum of four sets of Bluetooth handsets and supports phonebook transfers, and can be installed to use the existing car audio systems to output through the vehicle's speakers.

HiTV Communications Pty Ltd (HiTV) established in 2004 in Sydney, is devoted to cutting-edge design and technology in the field of mobile digital television and automotive electronic equipment. HiTV offers both aftermarket and OE solutions to Australian customers and is a leading innovator in the field of integrated in-car media and navigation in Australia. With proven experience, formidable design capability and expertise in this field, HiTV meets a need in the market place.
