RE: HiTV Communications has unveiled Australian First Touch Screen Navigation for FG Falcon

HiTV Communications is known in the market for providing innovative integrated in-car solutions. The latest in its product range is the next generation in-car navigation systems. The new products have been designed to turn your vehicle's video & audio entertainment system into a complete navigation system.

HiTV Communications has designed & developed Australia's first touch controlled GPS navigation system for FG Falcon, with world leading mapping and navigation software solutions for both on-road and off-road functions.

FG Falcon touch screen navigation system is powered by HiTV NaviPlus, the most versatile GPS navigation system in Australia. The new integrated navigation system offers complete touch panel controlled capability to factory installed system. The HiTV NaviPlus navigation system can be activated by pressing the steering control "Mode" button, allows touch screen controlled navigation become a reality in FG Falcon for the first time in Australia.

A choice of male and female voices is included to suit the driver's preference. Compared to external portable navigation devices (PNDs), HiTV NaviPlus for FG Falcon is a truly integrated solution for those who wish to make full use of their factory stereo display.

HiTV FG Falcon touch screen navigation offers both on-road and off-road capabilities with Navteq Maps and optional Hema Maps pre-installed. The maps provide elevation and 3D details, while well tested turn by turn functions provide informative route guidance. The on-road navigation comes with Horizon NavMate navigation software. Horizon has been a leader in the design of vehicle navigation systems for many years in USA, Europe and Worldwide.

HiTV'S NaviPlus utilises NavMate software that is also used in navigation systems marketed by Ford, Chrysler, General Motors, Nissan, and Porsche. In addition, users can expect fast route calculations, brilliant 2D/3D map display and speedometer and a trip computer all while perfectly integrated into the vehicle.

HiTV Communications Pty Ltd (HiTV), established in 2004 in Sydney, is devoted to cutting-edge design & technology in mobile digital TV & automotive electronic equipment. With strong design capability & expertise, HiTV is able to fill the gap in the market place. HiTV offers both aftermarket & OE solutions to Australian customers and is the leading innovator of integrated in-car media & Navigation provider in Australia.
